B. Qualifications

3. Tele Circuit is financially qualified to provide telecommunications services in Missouri.

4. Tele Circuit also has the managerial and technical resources necessary to operate in Missouri. Biographies of Tele Circuit's management personnel are provided in Exhibit C.

C. Description of Services

5. Tele Circuit seeks authority to provide intrastate interexchange telecommunications services throughout the State of Missouri. Therefore, Tele Circuit seeks statewide authority. Its services are expected to include long distance toll services, dedicated inbound or outbound calling services and calling card communication services.

6. Tele Circuit will provide all such services in accord with its tariffs. Tele Circuit's proposed interexchange tariff is being filed simultaneously with this Application and is attached hereto as Exhibit D. The proposed tariff contains the rules and regulations applicable to its customers, a description of the services offered, and a list of the rates associated with such services. The tariff has a forty-five (45) day effective date, as required by 4 CSR 240-3.510 (1)(c).

7. Tele Circuit will continuously monitor and maintain a high level of control over its network on a 24-hours-a-day, 7 days-a-week basis.

8. Tele Circuit will not unjustly discriminate among its subscribers, as prohibited by Section 392.200 RSMo.

9. Tele Circuit does not have any pending action or final unsatisfied judgments or decisions against it from any state or federal agency or court that involve customer service or customer rates, which action, judgment or decision has occurred within three (3) years of the date of this Application.

10. Since Tele Circuit is requesting certification as a new carrier, no annual reports or fees are overdue to the Commission.

D. Classification as a Competitive Company

11. Tele Circuit seeks classification as a competitive company, pursuant to Sections 392.361.2 and 392.361.3 RSMo., and the accompanying reduced regulation, pursuant to Section 392.420 RSMo.

12. Applicant respectfully requests that the Commission suspend, waive, or modify the application of the following rules and statutory provisions consistent with the Commission's treatment of other competitive carriers:

Statutes

§ 392.210.2	-	Uniform system of accounts
§ 392.240(1)	-	Rates - Average return on investment.
§ 392.270	-	Property valuation.
§ 392.280	-	Depreciation accounts.
§ 392.290	-	Issuance of stocks and bonds.
§ 392.300.2	-	Acquisition of stock
§ 392.310	-	Issuance of stock.
§ 392.320	-	Stock dividends.
§ 392.330	-	Issuance of securities, debts and notes.
§ 392.340	-	Reorganizations

Regulations

4 CSR 240-3.545(2)(C)	-	Rate schedules should be posted at central office
4 CSR 240-10.020	-	Depreciation of fund income.
4 CSR 240-30.040	-	Uniform System of Accounts
4 CSR 240-33.030	-	Minimum charges

13. The above-referenced statutory provisions or regulations have been waived with regard to other competitive carriers. These statutory provisions or regulations are principally designed to apply to noncompetitive telecommunications carriers. It would be inconsistent with the goal and purpose of Section 392.530 RSMo. to apply them to a competitive telecommunications carrier such as Applicant.

14. Tele Circuit will comply with all orders and regulations of the Commission applicable to providers of competitive interexchange telecommunication services except those that are specifically waived by the Commission.

15. To the extent that the Commission may modify its current waiver policies, Tele Circuit reserves the right to amend its waiver requests accordingly.

E. Public Interest Considerations

16. Applicant believes that granting the requested certificate is in the public interest for the following reasons:

(a) Applicant's proposed intrastate telecommunications services are developed to serve the long distance needs of subscribers who can not otherwise realize similar cost savings through major carriers.

(b) An increase in the traffic generated through provision of Applicant's proposed intrastate services over existing major carriers' communications facilities will improve the efficiency and reduce major carriers' costs in provision of these services.

(c) The public will benefit from greater consumer choice created through the broadening of innovative telecommunications service alternatives and ongoing affordable rates maintained by the additional competitive pressure placed on other competitors.

(d) Local Exchange Carriers will realize greater access charge revenues through the increase in traffic utilizing local access.

G. CONCLUSION

For the reasons stated above, Applicant respectfully submits that the public interest, convenience, and necessity would be furthered by a grant of this Application for a Certificate of

Service Authority to provide intrastate interexchange and non-switched local telecommunications services, classify Tele Circuit and its proposed services as competitive, and grant a waiver of the statutes and regulations referenced above.

Respectfully submitted,
